Research in Nursing and Health Care
Assessment 3: Research, Implementation and Evaluation

Structure of an Evidence Implementation Plan
<p>Title:</p> <ul style="list-style-type: none"> Succinct but descriptive <p>Summary or brief overview of plan</p>
<p>Background and literature review:</p> <ul style="list-style-type: none"> Is there a current problem or is there evidence for better practice? Does literature identify barriers and/or suggest how these might be overcome (e.g. frameworks and models)?
<p>Aims of the implementation:</p> <ul style="list-style-type: none"> What improvement or outcomes are expected? How will these outcomes be evaluated? <p>Identification of stakeholders, champions and targets</p> <ul style="list-style-type: none"> Who will be involved and when? <p>Identification of barriers</p> <ul style="list-style-type: none"> What or who might hinder the plan?
<p>Significance of the project:</p> <ul style="list-style-type: none"> Why is this practice change necessary?
<p>Method of knowledge transfer: Planned staging of implementation activities</p> <ul style="list-style-type: none"> How will barriers be addressed? How will stakeholders be involved? <p>Proposed evaluation</p> <ul style="list-style-type: none"> How will results be evaluated?
<p>Ethical or resource implications:</p> <ul style="list-style-type: none"> What are sources of potential harm to clients or disruption to practice and what measures will be taken to avoid these?
<p>Budget</p> <ul style="list-style-type: none"> What costs are associated with the implementation
<p>Justification</p> <ul style="list-style-type: none"> What is the cost-benefit to the organization and to the client in improved health care and outcomes?
<p>Time line</p> <ul style="list-style-type: none"> How long will the implementation take (including the evaluation of outcomes)?
